

Leading Utility Solutions™

uRead® Mobile Meter Reading

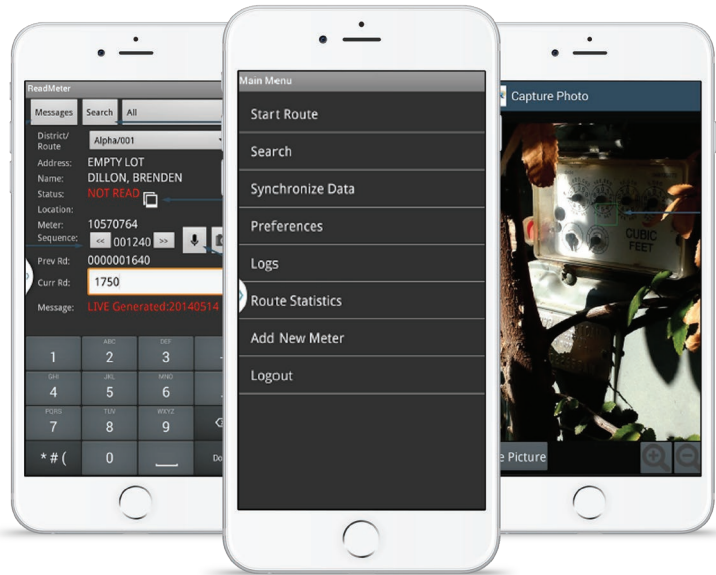

AVR's uRead®, brings the latest in mobile technology to the utility billing industry. Using inexpensive, off-the-shelf hardware, such as smartphones and tablets, uRead® customers have an enterprise-class mobile meter reading solution to equip their fleet while keeping meter-reading costs to a minimum, even over unreliable internet connections.

Meter Reading Software Solutions

Meter Reading on the Go

In the field, users can enter reads and upload directly into a cloud based storage. Meter reads are backed up every few minutes to ensure no loss of reads.

From the cloud, download meter reads into your billing software or easily integrate to our AVR system. Before posting, staff has the control to authenticate the recordings.
